

Dispersing Agent

Technical Data Sheet

Product name

Dispersing agent(NNO)

Chemical Name

Naphthalene sulphonic acid-formaldehyde condensation sodium salts

Description

This product is brown(light yellow) powder, the dry substance is freely soluble in water of any hardness with good acidity and alkalinity, hard water and salt resistance.

It has good dispersing performance and it is a highly effective anionic dispersant for dyestuffs and pigment, It can be used with anionic and nonionic surface active agents.

It is used as dispersant of disperse dyes,dyeing(textile)auxiliary and dispersant of pigment.

Uses

Dispersing agent is used as levelling agent,dyeing auxiliary,auxiliary tanning agent in leather-making industry.

Packing

25kgs/bag,Kraft Paper bag

Shelf Life

24 months

Specification

Item Names	Indexes
Dispersing force (standard product),%	95
pH(1%water solution)	7~9
Content of sodium sulfate,%	≤ 15
Fineness (residue through 60-mesh sieve),%	≤ 5
Impurity content insoluble in water,%	≤ 0.2
